CITY OF JAMESTOWN

EACH issue of the Jamestown Directory shows a steady increase in the population of Jamestown—no phenomenal boom, it is true, but a gradual growth that year by year takes the city one step nearer the proud position of city of the second class.

Jamestown has long since been the metropolis of Chautauqua county, and pays more than a quarter of the entire taxes of the county. If the present advancement continues, in a few years more than half the property on the tax roll of the county will be located inside the city limits.

Jamestown was located in 1806 by James Prendergast in whose honor the city was named. It was incorporated in 1886. The city is in the center of one of the most prosperous and progressive dairying regions in the United States. It is the market town of southern Chautauqua and a portion of Cattaraugus, N. Y. and Warren county, Pa.

Jamestown has good transportation facilities. It is located on the main line of the Erie between Chicago and New York. It is the southern terminus of the Buffalo & Southwestern branch of the Erie. It is connected with the Lake Shore & Michigan Southern Railroad the New York, Chicago & St. Louis Railroad (Nickle Plate), the Pennsylvania Railroad and the Buffalo & Lake Erie Traction Company, by means of the Jamestown, Westfield & Northwestern Railroad, formerly known as the Jamestown, Chautauqua & Lake Erie Railroad which extends from Jamestown to Westfield on the east side of Chautauqua lake, and by the line of the Chautauqua Traction Company which extends from Jamestown to Barcelona on the west side of Chautauqua Lake. The Buffalo & Lake Erie Traction Company extends from Buffalo to Erie, passing directly through the Chautauqua grape belt. Thus the city has quick and easy communication with this region.

The Dunkirk, Allegheny Valley & Pittsburgh Railroad touches Falconer, which is connected with Jamestown by means of the Jamestown Street Railway. This road taps a rich region in western Pennsylvania and New York, extending from Titusville to Dunkirk.

There are three trolley companies in the city, the Jamestown Street Railway Company, which has four belt lines, and a main line extending from Jamestown to Falconer on the east and from Jamestown to Lakewood on the west, the Chautauqua Traction Company which extends from Jamestown to Mayville and Westfield, and the Warren & Jamestown Street Railway Company which extends from Jamestown to Warren, Pa.

Jamestown is advantageously situated on the Chautauqua lake outlet, or Chadakoin River only a short distance from Chautauqua lake. Six adequate excursion steamers make constant trips over the lake during the summer months, and afford residents of the city an opportunity for agreeable and healthful outings. The Celoron Amusement Company maintains a beautiful park at the entrance to the outlet and this also is liberally patronized by Jamestown residents during the summer.

One of the desirable features of Jamestown is the fact that the manufacturing industries are so diversified that there are no "dull times." When one industry is running short handed and on short time others are the busiest.

Jamestown is the headquarters of the metal furniture industry of the United States It also ranks second in the manufacture of wooden furniture It is also the headquarters for the manufacture of voting machines. The worsted mills are extensive and well managed. The annual output of all these factories is approximately $117,000,000.

The last United States census of manufacturers, (1909), gives the number of establishments as 156. Capital invested, $16,075,000. Value of product for year, $14,720,000. Number of salaried officials and clerks, 822. Average number of wage earners, 6,789.

Jamestown has been aptly termed a city of homes. Probably a larger proportion of the residents of Jamestown own their own homes than is the case of any city of similar size in the state of New York.

Jamestown is remarkably free from crime and the criminal element. There are more churches in proportion to the inhabitants than in most communities. All told Jamestown has 25

churches of various denominations. One denomination has the largest membership of any city in the United States. The church edifices are commodious and costly and add much to the appearance of the city.

Two hospitals for the care of the sick and injured are maintained. One under the auspices of the Woman's Christian Association has done admirable work for many years. During the year 1911 the O. E. Jones Memorial Hospital, erected on a tract of ground willed to the city by the late O. E. Jones, was opened to the public. The city has spent over $50,000 on the plant and it is finely equipped.

Jamestown has a number of handsome public buildings, viz: Federal building, $150,000; City Hall, $65,000; James Prendergast Library and Art Gallery, $125,000; State Armory, $50,000; nine fire houses.

The Young Men's Christian Association owns a building and plant valued at $100,000, and the Young Women's Christian Association a handsome building, which with lot cost $65,000.

The Agnes Association owns a large brick residence and grounds which is conducted as a boarding home for working girls.

The Warner Home for the Aged, the latest of Jamestown's benevolent institutions had its beginning in 1911 and received at the hands of Mrs. Mary H. Warner the L. B. Warner homestead on Forest Avenue as a memorial to Mr. Warner who died in 1905.

The school system of Jamestown is one of the best in the state. There is the large High School building, the magnificent Sherman Street Grammar School which is a model of its kind. The new Fairmount School, the Euclid Avenue School and eleven branch or district schools.

The city has an ample supply of the purest water drawn from inexhaustible artesian wells located in the Cassadaga valley at Levant, about a mile east of Falconer, and pumped to a mammoth reservoir located on English Hill on the south side of the city which was completed by the city in 1913. The rates are low and under the capable management of a commission composed of the leading business men, the plant is paying for itself at the rate of $15,000 per year.

There is a municipal light plant, also managed by a commission of capable business men, which furnishes street lights and light and power for commercial purposes. A private plant, excellently managed also furnishes light and power at low rates.

There are two telephone systems, which provide unusually good telephone service at low rates.

One of the factors which has contributed materially to the development of the business enterprises of Jamestown and consequently the growth and prosperity of the city, is the support of the banking institutions. There is one trust company and five banks, all doing a conservative but prosperous business. It is a fact worthy of note and comment, that there has never been a bank failure in Jamestown And the reason for this is that banking enterprises have been conducted along legitimate lines and without any incursions in the field of high finance or indulgence in the reckless speculation that has wrecked so many institutions in this country. Probably there is not another city of equal size in the state of New York which has a record equal to this.

A comprehensive park system has been planned and a park commission composed of public spirited citizens who have given and are giving much valuable time gratuitiously to the work developing these parks into beauty spots that will be a credit to the city. One of the largest of these parks is the Allen Park located on the south side, one of the most picturesque and beautiful spots in the city.

What is known as the "Hundred Acre Lot," a picturesque woodland lying on the borders of the city has recently been acquired, through public subscription, for the particular benefit of the pupils of the public schools and will prove a delightful spot for recreation and education of adults as well.

There are two parks on the north side, one between West Fourth and West Fifth streets, known as Baker Park, and the other between West Sixth and West Seventh streets, known as Dow Park.

The Jones Memorial Park of which mention has been made is on the shores of Chautauqua lake outlet. It is still in a rough state but in time will be made in a modern park.

Jamestown has an exceedingly healthful location. The hills provide a natural drainage for surface water, and a comprehensive sewer system provides for the sanitary needs of the city. The death rate of the city is one of the lowest in the state.

The area of the city is 6136 acres or approximately nine and one-half square miles. There are more than

twenty miles of paving. The paving is chiefly shale brick although some of the residence thoroughfares are paved with bithulithic and asphalt block.

The assessed valuation of the city in 1906 was $12,231,970. In 1907 it was $13,303,485; in 1908, $13,347,891; in 1909, $13,498,331; in 1910, $14,133,149; in 1911, $14,989,717 and in 1912, $16,046,366 and in 1913, $16,981,395, divided as follows:
