W. Stackhouse Is Promoted

The promotion of Wells F. Stackhouse to vice president of engineering and manufacturing of American Locker Co. Inc., a wholly-owned subsidiary of AVM Corp., has been announced by George Niden, company president.

Harold J. Ruttenberg, AVM president and chairman, said Mr. Stackhouse is the nation's leading coin-lock engineer with many patents to his credit. Mr. Ruttenberg commented, "We are confident that his extensive experience will greatly contribute to American Locker's manufacturing requirements."

Prior to his promotion, Mr. Stackhouse served as American Locker's chief engineer since 1964. In his new position, he will have overall responsibility for mechanical development and manufacture of the company's self-service, coin-operated lockers and key-controlled security locker systems throughout the world. He also will be responsible for supervision of the company's entire engineering program, including design and development of new product lines.

A native of Rahway, N.J., Mr. Stackhouse attended American University in Washington, D.C., and received further training in manufacturing processes and value analysis at Jamestown Community College. He served in the U.S. Navy from 1943-45.

Mr. Stackhouse has been active with the YMCA for many years and is a past Y's Men's president and a past YMCA director. He also is a past commodore and 12-year member of Chautauqua Lake Yacht Club. Professional memberships include the American Society of Testing Materials and American Society of Mechanical Engineers.

Mr. Stackhouse and his wife, Catherine, live in Ashville. They are parents of a daughter and two sons.
