

Strike End Not in Sight

FEB 10 1950

No indications of an immediate meeting between union and company officials at Dahlstrom Metallic Door Company were made today, the fourth day of a strike affecting more than 600 employes.

The union, Local 307, United Electrical, Radio & Machine Workers, is asking for a general wage increase, a company-paid insurance plan and two additional paid holidays.

No statements, either from the union or management, were made up until noon today. Orderly picketing is continuing at the plant's entrances on a day and night schedule.
