

# Ellison Bronze Wins Craftsmanship Award

A 1955 Craftsmanship Award has been received by Ellison Bronze Company, Inc., 125 West Main Street, Falconer, from the Building Congress and Exchange of Baltimore for outstanding work done in that city by the local organization.

The award, made at the 67th annual meeting of the Exchange, was in the alterations division, one of 11 categories in which superior craftsmanship was recognized.

It was given specifically for bronze work done during alterations to Sun Life Insurance Company of America, 109 East Redwood Street, Baltimore. The work included installation of entrance units, planting boxes, railings and cast bronze letters.

M. P. Beere Company, Baltimore representative of Ellison Bronze, made the installations. David Dilworth was mechanic.

The award was accepted for the local company by Charles Davis of the sales division. The presentation was made by Julius C. Meyer, chairman of the Craftsmanship Awards Committee.

The Building Congress and Exchange, established in 1888, is the representative of the entire building industry in Baltimore. It encourages craftsmanship by awards to stimulate superior workmanship and, as far as possible, discourages and corrects improper practices in the industry.

Among the Falconer firm's better known projects in recent years was construction of a stainless steel bar for the luxury liner, SS. United States, and of a huge alu-

minum replica of the seal of the City of Baltimore, which is featured on the facade of that city's new memorial auditorium.

**ELLISON BRONZE CRAFTSMANSHIP HONORED**—Charles Davis, center, of the sales division of Ellison Bronze Company Inc., Falconer, accepts an outstanding craftsmanship certificate from Julius C. Meyer, chairman of the Building Congress and Exchange of Baltimore's Craftsmanship Awards Committee, as David Dilworth, mechanic in charge of the installation, looks on. The award was made for outstanding work done by the local firm during alteration of a Baltimore office building.
